Re: Low Detection Limit SOP's
American Chemical Services RI/FS

Dear Mr. Swale:

Please find enclosed Standard Operating Procedures (SOP's) for the analysis of volatile organic compounds, semivolatiles and pesticide/PCB's in residential well samples near the American Chemical Services (ACS) Site. These SOP's are to be included in the ACS QAPP Addendum dated December 1989.

I have also included a copy of the letter CompuChem sent to Dr. Tsai of the Region V, Quality Assurance Section (QAS) regarding these SOP's. It is CompuChem's understanding that they will follow the (SOP's) with the modifications outlined and agreed to in the attached letter.

Should you have any questions regarding this information please call me at (608) 273-0440.

Sincerely,

WARZYN ENGINEERING INC.

John D. Dadisman
Project Chemist
